The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

Acknowledgments

The data collection, preparation, and table production of this report were supported through an interagency agreement with the U.S. Census Bureau. The Educational Finance Branch of the Census Bureau's Economic Reimbursable Surveys Division and a network of state and local education agency coordinators shared responsibility for data collection and processing, nonresponse follow-up, and resolution of data inconsistencies. While their names are too numerous to mention here, their time, effort, and commitment toward providing accurate school district finance data are gratefully appreciated. Particular thanks are owed to the state fiscal coordinators, whose efforts make the Common Core of Data (CCD) program possible.

Introduction

This First Look report presents data on public elementary and secondary education revenues and expenditures at the local education agency (LEA) or school district level for fiscal year (FY) 2013.¹ Specifically, this report includes findings from the following types of school finance data:

- Revenue and expenditure totals by state and the 100 largest LEAs;
- Federal revenues received by local education agencies by program and state;
- Expenditures by function and object totals by state;
- and Current expenditures per pupil by state and the 100 largest LEAs.

A function describes the activity for which a service or material object is acquired. The expenditure functions include instruction, instructional staff support services, pupil support services, general administration, school administration, operations and maintenance, student transportation, other support services (such as business services), food services, enterprise operations, and total current expenditures. An object is used to describe the service or commodity obtained as a result of a specific expenditure. Objects reported within a function include salaries, employee benefits, purchased services, supplies, and equipment (see Appendix B).

The finance data used in this report are from the School District Finance Survey (F-33),² a component of the Common Core of Data (CCD). The CCD is the primary National Center for Education Statistics (NCES) database on public elementary and secondary education in the United States. The F-33 survey consists of LEA-level finance data submitted annually to NCES and the Economic Reimbursable Surveys Division of the United States Census Bureau (Census Bureau) by state education agencies (SEAs) in the 50 states and the District of Columbia. The SEAs submit data in conformance with *Financial Accounting for Local and State School Systems: 2014 Edition* (Allison 2014), the NCES handbook that provides guidance to SEAs and LEAs in establishing and maintaining their school financial accounting systems.

SEAs report financial data for a variety of types of LEAs covering services that provide or support prekindergarten through high school for public education. The F-33 data file used to create this report includes regular school districts, independent charter school districts, as well as a substantial number of administrative and operating LEAs that are unlike typical school districts (e.g., education service agencies that provide specialized education services for school districts, such as vocational and technical training or education services for children with disabilities). In school year 2012–13 (FY 13),³ there were 18,477 school districts on the F-33 file in the 50 states

¹ The terms “school district” and “LEA” are used interchangeably throughout this report.

² The term “F-33” is the form number utilized for the School District Finance Survey collection instrument. The School District Finance Survey is commonly called the F-33.

³ School year 2012–13 and FY 13 are used interchangeably throughout this report. See page A-4 for more detailed information.

and the District of Columbia.⁴ SEAs reported finance data for 18,004 or 97.4 percent of school districts on the F-33 file.

Data for tables 1, 2, and 4 include all types of LEAs reported on the F-33 file—including regular school districts, independent charter school districts, and education service agencies. Table 3 presents the revenues and current expenditures of the 100 largest school districts in order of their student enrollment. Table 5 provides a comparison of independent charter school district per pupil finances against noncharter school district per pupil finances by state.

The source for the data and findings included in this report is the FY 13 F-33 provisional (version 1a) data file. Provisional F-33 data have been subject to at least two rounds of extensive data review and editing. NCES releases provisional data in an effort to provide earlier access to the data. Revisions submitted after the provisional data file has been finalized will be incorporated in the final file for each fiscal year, which will be released at the same time as the release of provisional data for the following year.

The purpose of this First Look report is to introduce new data through the presentation of tables containing descriptive information. The selected findings chosen for this report demonstrate the range of information available when using F-33 data files. The selected findings do not represent a complete review of all observed differences in the data and are not meant to emphasize any particular issue.

Appendix A describes the survey content and methodology. Appendix B is a glossary of key terms used in this report. Appendix C includes a table with the difference in median current expenditures per pupil in noncharter districts and independent charter school districts for 22 states that reported data. Appendix D includes the final FY 12 tables that includes all revisions since the tables were originally published in the report entitled *Revenues and Expenditures for Public Elementary and Secondary School Districts: School Year 2011–12 (Fiscal Year 2012) (NCES 2014-303)*.

More information about related surveys and products is available at <http://nces.ed.gov/ccd>.

⁴ The file of LEAs comes from the FY 13 LEA directory submitted by SEAs through the ED*Facts* submission system.

Selected Findings: Fiscal Year 2013

- In FY 13, current expenditures per pupil in the 100 largest public school districts ranged from a low of \$5,539 in Alpine School District, Utah to a high of \$20,331 in New York City School District, New York (table 1). Current expenditures per pupil were next highest in Boston City Schools, Massachusetts (\$19,066); Philadelphia School District, Pennsylvania (\$16,381); Anchorage School District, Alaska (\$15,391); Montgomery County Public Schools, Maryland (\$15,080); Baltimore City Schools, Maryland (\$15,050); Howard County Public Schools, Maryland (\$14,884); Detroit City School District, Michigan (\$14,259); Prince George's County Public Schools, Maryland (\$14,101); Columbus City School District, Ohio (\$13,794); and Fairfax County Public Schools, Virginia (\$13,670).
- In FY 13, current expenditures per pupil from the two largest school districts within each state in the Northeast were highest in Newark City Public Schools, New Jersey (\$24,670), Jersey City Public Schools, New Jersey (\$21,819), and New York City Public Schools (\$20,331); in the South were highest in District of Columbia Public Schools (\$17,953), Christina School District, Delaware (\$16,664), and Montgomery County Public Schools, Maryland (\$15,080); in the Midwest were the highest in St. Paul Public School District, Minnesota (\$14,286), Detroit City School District, Michigan (\$14,259), and Cleveland Municipal School District (\$13,980); and in the West were highest in Anchorage School District, Alaska (\$15,391), Laramie County School District #1, Wyoming (\$14,971), and Hawaii Department of Education (\$11,823) (table 2).
- The national median of total revenues per pupil across all LEAs was \$11,745 in FY 13, which represents a decrease of 1.8 percent from FY 12, after adjusting for inflation⁵ (table 3). The national median of current expenditures per pupil among all LEAs was \$10,047 in FY 13, a decrease of 0.5 percent from FY 12. States with the highest median current expenditures per pupil across LEAs in FY 13 included Alaska (\$26,476), New York (\$19,073), District of Columbia (\$17,953), Wyoming (\$16,872), New Jersey (\$16,379), Connecticut (\$16,204), and Rhode Island (\$14,379). On a national basis, in the absence of any geographic cost adjustment median current expenditures per pupil were \$9,353 in cities, \$11,041 in suburbs, \$9,214 in towns, and \$10,347 in rural areas.
- A total of 24 states reported finance data that met reporting standards for both independent charter school districts and noncharter school districts in FY 13. The median current expenditures per pupil among independent charter school districts was at least 10 percent lower than median current expenditures per pupil among noncharter school districts in 14 out of those 24 states. The median current expenditures per pupil for independent charter school districts was at least 10 percent higher than median current expenditures per pupil for noncharter school districts in 2 out of those 24 states (table 4 and C-1).
- In FY 13 school districts received \$55.1 billion from the federal government for public

⁵ Whenever comparisons were made between FY 12 and FY 13 data, the FY 12 data were adjusted to FY 13 dollars. Inflation adjustments utilize the direct multiplier in the Consumer Price Index published by the U.S. Department of Labor, Bureau of Labor Statistics. For comparability to fiscal education data, NCES adjusts the multiplier from a calendar year to a school fiscal year basis (July through June). See *Digest of Education Statistics 2013*, Table 106.70, http://nces.ed.gov/programs/digest/d13/tables/dt13_106.70.asp downloaded April 9, 2015.

elementary and secondary education, which represents a decrease of 10.7 percent from 61.7 billion received in FY 12, after adjusting for inflation (table 5 and D-1). In FY 13 Title I funds accounted for \$14.2 billion or 25.8 percent of federal revenues for education, special education programs received \$11.2 billion or 20.4 percent, child nutrition programs accounted for \$14 billion or 25.4 percent, and Impact Aid funds accounted for 1.5 billion or 2.8 percent (percentages derived from table 5).

- On a national basis, \$224.6 billion or 37.0 percent of total revenues for public and elementary secondary school districts were derived from local property taxes and parent government contributions in FY 13 (table 6 and figure 1). The percentage of revenues derived from local property taxes and parent government contributions exceeded 50 percent in 5 states, fell between 40 and 50 percent in 14 states, fell between 20 and 40 percent in 23 states, and fell below 20 percent in 9 states.

¹The student membership obtained from the Common Core of Data (CCD) fiscal district data collection may vary slightly from the student membership obtained from the CCD nonfiscal data collection. Wyoming indicated that their fiscal data reported in the School District Finance Survey (F-33) excluded prekindergarten programs. In this state, the F-33 total student membership variable excludes prekindergarten membership.

²Funds spent operating local public schools and local education agencies, including such expenses as; salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding; capital outlay, interest on school debt, payments to private schools, and payments to public charter schools.

³The school district operates charter schools in addition to noncharter schools.

¹Interschool system expenditures are excluded to prevent double counting.

²Includes instruction and instructional staff support services current expenditures.

³Includes student support services, operation and maintenance of plant, student transportation, general administration, school administration, business, central, and other support services.

⁴Includes food services and enterprise operations current expenditures.

⁵Funds spent operating local public schools and local education agencies, including such expenses as; salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding; capital outlay, interest on school debt, payments to private schools, and payments to public charter schools.

⁶Includes purchased services, supplies, and other miscellaneous current expenditures.

NOTE: All local education agencies reported in the School District Finance Survey (F-33) are included in this table. Consequently, results for per pupil current expenditures may differ from amounts reported in Table 3.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (F-33)," fiscal year 2013, Provisional Version 1a.

† Not applicable.

¹Funds spent operating local public schools and local education agencies, including such expenses as; salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding; capital outlay, interest on school debt, payments to private schools, payments to public charter schools, and nonelementary secondary expenditures (such as adult education).

²Data for school districts with unassigned locale codes or with locale codes reported as "not applicable" in the SY 2012–13 CCD LEA Universe Survey file are included within the national and state totals in this table, but are excluded from the locale-specific totals.

³Data have been adjusted to fiscal year 2013 dollars to account for inflation using the Consumer Price Index (CPI), which is published by the U.S. Department of Labor, Bureau of Labor Statistics. This price index measures the average change in inflation of a fixed market basket of goods and services purchased by consumers. For additional information about inflation-adjusted data, please refer to appendix A.

NOTE: How to read this table: Using Alabama as an example, if all school districts were listed by size of total revenues per pupil, the district at the midpoint (median) in 2012 would have total revenues per pupil of \$9,619 (in 2013 dollars).

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (F-33)," fiscal year 2012, Final Version 2a and fiscal year 2013, Provisional Version 1a; Digest of Education Statistics 2013, retrieved April 9, 2015, from http://nces.ed.gov/programs/digest/d13/tables/dt13_106.70.asp.

— Not available.

† Not applicable.

‡ Reporting standards not met. Data was suppressed when the unweighted response rate was below 80 percent for a state or 85 percent for the reporting states total.

¹Interschool system expenditures are excluded to prevent double counting.

²Includes instruction and instructional staff support services current expenditures.

³Includes student support services, operation and maintenance of plant, student transportation, general administration, school administration, business, central, and other support services.

⁴Number of districts or number of students in the F-33 survey that fall within the scope of either a noncharter school district or an independent charter school district.

⁵Number of districts or number of students in the F-33 survey that fall within the scope of either a noncharter school district or an independent charter school district and reflects only those districts that reported fiscal data greater than or equal to zero and student membership greater than zero.

⁶The student membership obtained from the Common Core of Data (CCD) fiscal district data collection may vary slightly from the student membership obtained from the CCD nonfiscal data collection.

⁷Student membership was not reported on the district-level CCD Local Education Agency Universe Survey for independent charter school districts in New Hampshire. As a result, the source of the student membership for both charter and noncharter school districts shown in this table for New Hampshire is state-aggregated membership from the school-level CCD Public Elementary-Secondary School Universe Survey.

⁸All associated schools are charter schools.

⁹Independent charter school districts and school districts that have charter and noncharter schools are excluded from this category.

¹⁰Reporting states include only the states reported in this table.

NOTE: Median expenditures are reported for each data item, so details do not sum to totals.

— Not available. State is unable to report this federal program separately. These revenues are included in the "Other and unspecified federal revenues through state" and/or "Other federal revenues direct to school districts" categories of this table and included in the total.

‡ Reporting standards not met. Data were missing for more than 15 percent of agencies in the 50 states and the District of Columbia at the national level, or data were missing for more than 20 percent of agencies in the state at the state level. These revenues are not included within any of the program-specific categories in this table, but are included in the total.

¹Includes revenues from the Workforce Investment Act, federal grants for adult education, and other federal revenues through the state.

²Includes Indian education, Head Start, magnet schools, gifted and talented, and other federal revenues direct to school districts.

³Federal revenues were missing for 3 percent of school districts in the 50 states and the District of Columbia for Title I, 4 percent for special education, 17 percent for math and science, 13 for drug-free schools, 5 percent for vocational education, 3 percent for child nutrition, 21 percent for bilingual education, 3 percent for other and unspecified revenues through state, 4 percent for impact aid, and 30 percent for other revenues direct to school districts.

NOTE: All local education agencies reported in the School District Finance Survey (F-33) are included in this table.

Rounds to zero.

† Not applicable.

¹Interschool system transactions are excluded to prevent double counting.

²The "Property taxes" and "Other taxes" columns only include the tax revenues of "independent" school districts that are not fiscally and administratively dependent on another government entity. "Dependent" school districts that are fiscally and administratively dependent on another government entity have their property tax revenues included in the "Parent government contributions" column of this table.

³Includes revenues from all local nonproperty taxes, such as sales taxes and income taxes.

⁴Includes revenues from sale of property, interest earnings, private contributions, and other miscellaneous local revenues not classified elsewhere.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (F-33)," fiscal year 2013, Provisional Version 1a.

Appendix A: Methodology and Technical Notes

Common Core of Data (CCD) survey system. The CCD is the primary National Center for Education Statistics (NCES) database on public elementary and secondary education in the United States. The annual CCD is a comprehensive national statistical database of all public elementary and secondary schools and school districts that contain comparable data across all states. The CCD contains both nonfiscal and fiscal components. The State Nonfiscal Survey of Public Elementary/Secondary Education, the Local Education Agency (LEA) Universe Survey, and the Public Elementary/Secondary School Universe Survey are the nonfiscal components, while the School District Finance Survey (F-33) and the National Public Education Financial Survey (NPEFS) are the fiscal components.

State education agencies (SEAs) report data for these CCD surveys annually to NCES. The U.S. Census Bureau conducts the data collection for the finance surveys on behalf of NCES. The U.S. Department of Education collects data for all three CCD nonfiscal universe surveys through the *EDFacts* submission system.¹ The membership (i.e., enrollment) data used in this report come from the LEA Universe Survey. SEAs participate in CCD voluntarily, following standard definitions for the data items they report.

F-33 data collection. The F-33 survey is a collaborative effort of NCES and the U.S. Census Bureau (Census Bureau).² Each year NCES and the Census Bureau work closely with SEAs to provide training and instruction on data definitions for fiscal data items and to collaborate on solutions to common data problems. SEAs report the F-33 data primarily through an online data collection site. The Census Bureau and NCES then process, edit, and verify the data before publication. The fiscal year (FY) 2013 F-33 collection opened on January 27, 2014 and closed on December 31, 2014. States report data to the Census Bureau in either the F-33 survey format or in the individual state agency's financial accounting format. When SEAs report data in their state agency format, Census Bureau analysts conform state-formatted data to the format for variables in the F-33. For a detailed synopsis of which SEAs reported F-33 data in their own format as opposed to the "Census format" please see *Documentation for the NCES School District Finance Survey (F-33), School Year 2012–13 (Fiscal Year 2013)(NCES 2015-000)*.

Editing data to ensure quality. *NCES Statistical Standards* require that all NCES data be edited to ensure data quality. Data editing is an iterative and interactive process that includes procedures for detecting and correcting errors in the data (NCES 2014). When F-33 data are uploaded into the F-33 collection and processing system, the data review system applies a series of edit checks (often referred to as business rules) to detect potential errors or inconsistencies in the reported data. The F-33 survey analysts review the editing of F-33 data submissions and ask state fiscal coordinators to correct or confirm any numbers that appear out

¹ *EDFacts* is a U.S. Department of Education initiative to collect, analyze, report on, and promote the use of high-quality, kindergarten through grade 12 (K–12) performance data for use in education planning, policymaking, and management and budget decisionmaking to improve outcomes for students. *EDFacts* centralizes data provided by SEAs, LEAs, and schools, and provides users with the ability to easily analyze and report on submitted data.

² The F-33 survey is part of the Census Bureau's Annual Surveys of State and Local Government Finances. Census Bureau publications including F-33 data can be found at <http://www.census.gov/govs/school/>.

of range when compared with other states' data or with the state's data submissions in previous years. If an SEA does not provide a correction or reasonable explanation for anomalous data, F-33 survey analysts will correct the data based on a defined set of business rules or in some cases suppress data that do not meet quality standards and cannot be corrected.

Medians. A median is a value in an ordered set of values for which there is an equal number of values above or below or which is the arithmetic mean of the two middle values if there is no one middle number.

Missing data. When reporting totals for a state, if information is missing for more than 20 percent of the school districts, NCES suppresses the totals for that state (NCES 2014). When reporting national totals, if information is missing for more than 15 percent of the school districts, NCES suppresses the national totals; if information is missing for no more than 15 percent of the school districts, NCES calculates totals and identifies them as "reporting states" totals (rather than totals for the United States). A "reporting states" total is calculated for federal revenues by program in table 5 in this report, because not all 50 states and the District of Columbia reported all the specific federal revenues in FY 13. For these states, the missing federal revenues are included in the "Other and unspecified revenues through state" and/or "Other revenues direct to school districts" categories.

Current expenditures. Researchers generally use current expenditures instead of total expenditures when comparing education spending between states or across districts because current expenditures exclude expenditures for capital outlay, which tend to have dramatic increases and decreases from year to year. Also, the current expenditures commonly reported are for public elementary and secondary education only. Many school districts also support community services, adult education, private education, and other programs, which are included in total expenditures. These programs and the extent to which they are funded by school districts vary greatly both across and within states and districts.

Comparing expenditures across districts. District-level analyses and comparisons can be complicated by the variety of administrative structures that exist across the nation in school districts. States such as Florida, Maryland, Nevada, and West Virginia have large districts that serve entire counties and encompass all levels and types of public schools. School districts in other states may exist in small communities with only one school or in larger communities where all elementary schools are in one school district and all secondary schools are in another. In some states, all special education schools are administered by a few specific districts; in other states, each district may have all kinds of schools and programs. Additionally, some states have districts that perform specific administrative functions that support other districts (i.e., education service agencies). However, NCES does not currently have data that explains how much of services provided by special types of districts can be attributed to students enrolled in regular school districts. This variability in the types of school districts makes it difficult to compare expenditures across school districts. The analyses in this report do not take into account geographic cost differences across districts.

Comparing NPEFS and F-33. The state-level NPEFS reports many of the same or similar data items as the district-level F-33 survey. Researchers, policymakers, practitioners, and the public may try to compare revenue and expenditure totals based on data for those variables or data for

individual items. However, the data user should be cognizant that there may be differences between data items on the state-level and district-level school finance collections that are not readily discernable. The survey coverage is different as NPEFS includes special state-run and federal-run school districts that are not included in the F-33. Expenditures on state-run schools are included on NPEFS, but are excluded on the F-33. The data availability also varies because some data might be available at the state level but not available at the district level, so the state-aggregated district totals from F-33 might not be equal to the state totals in NPEFS. The data may also vary because of different procedures that are utilized when certain states submitted NPEFS and F-33 data in their own format instead of the NCES-requested format.³ In these instances, Census Bureau analysts design and implement a “crosswalk” system to conform state-formatted data to the format for variables in the F-33. Differences in expenditures for similar data items between the two surveys can also occur based on the methodology that the state respondents use to “crosswalk” their NPEFS or F-33 data. Finally, the imputation and editing processes and procedures between the two surveys can vary. For further detail on imputations and editing data, please see *Documentation for the NCES Public Education Financial Survey (NPEFS) School Year 2012–13 (Fiscal Year 2013) (NCES 2015-000)* and *Documentation for the NCES School District Finance Survey (F-33), School Year 2012–13 (Fiscal Year 2013) (NCES 2015-000)*.

Comparing NCES and Census Bureau data files from the F-33 data collection. The F-33 data collection produces two data files: one entitled the School District Finance Survey for distribution and reporting by NCES, and one entitled the Annual Survey of Local Government Finances for distribution and reporting by the Census Bureau. Researchers, policymakers, practitioners, and the public should be aware that the data files are not interchangeable in some respects. Specific differences between the collections include:

- Inclusion of independent charter school districts—NCES requests that states report fiscal data in the F-33 survey for all independent charter school districts and all regular school districts that include charter schools. The majority of states report school finance data for all charter schools in the NCES F-33 data file. By contrast, the F-33 data file and report produced by Census include only school districts that meet the Census Bureau’s definition of a government entity. A charter school with an oversight board or entity that is either elected or appointed by an elected official is considered a government unit by the Census Bureau. All charter schools are not included within the Census F-33 data file by virtue of following this definition.
- State payments on behalf of school districts—NCES combines state government expenditures for and on behalf of school districts with expenditures school districts make directly for all applicable data items. By contrast, the Census Bureau reports state government expenditures on behalf of school districts and expenditures that school districts make directly as separate data items.

³ The “crosswalk” translates the amounts states report in state agency format to amounts for each F-33 survey variable.

- Classification of state and local tax revenues—NCES classifies tax revenues as being from local or state sources, as identified by each state submitting data. The Census Bureau classifies tax revenues as local or state depending on which level of government (local or state) imposed, collected, and distributed the tax revenue. Some tax revenues that NCES categorizes as state are categorized as local by the Census Bureau.

Inflation-adjusted data. When comparing dollar amounts between two or more fiscal years, NCES adjusts the older data for inflation to the most recent fiscal year using the Consumer Price Index (CPI) that has been converted from a calendar year basis to a fiscal year basis (July through June).⁴ The CPI is published by the U.S. Labor Department, Bureau of Labor Statistics. This price index measures the average change in inflation of a fixed market basket of goods and services purchased by consumers.

Fiscal years. The fiscal year begins on July 1 and ends on June 30 for most states. The fiscal year for Alabama and Washington, DC runs from October 1 through September 30, and the fiscal year for Nebraska, Texas, and Washington runs from September 1 through August 31. NCES does not adjust F-33 data to conform to a uniform fiscal year across states. A fiscal year relates to a school year as the latter year of the school year range. For example, FY 13 corresponds to school year 2012–13.

ARRA data. In February 2009, Congress passed the American Recovery and Reinvestment Act of 2009 (ARRA). The ARRA legislation allocated federal education funds directly to the states.⁵ As a result of ARRA, NCES added seven data items to NPEFS and three data items to the F-33 in order to collect and analyze data pertaining to Title I, Impact Aid, and other U.S. Department of Education funds. NCES collected ARRA-related data in the F-33 and NPEFS collections for FY 09 through FY 13. ARRA data are not being separately reported in this First Look report.

For a more comprehensive explanation of the methodology utilized by the F-33, please see *Documentation for the NCES School District Finance Survey (F-33), School Year 2012–13 (Fiscal Year 2013)*(NCES 2015-000).

The F-33 files can be accessed at <http://nces.ed.gov/ccd/f33agency.asp>.

⁴ FY 12 data used for comparison in the selected findings and FY 12 data in table 2 were adjusted by multiplying the reported variable by 1.0166959578. *Digest of Education Statistics 2013*, Table 106.70, http://nces.ed.gov/programs/digest/d13/tables/dt13_106.70.asp downloaded April 9, 2015.

Appendix B: Common Core of Data Glossary

general administration expenditures—Expenditures for establishing and administering policy to operate a school district. Expenditures include salaries, benefits, purchased services, and supplies for the office of the superintendent and board of education services.

school administration expenditures—Expenditures for directing and managing the operation of a school. Expenditures include salaries, benefits, purchased services, and supplies for the office of the principal and full-time department chairpersons.

capital outlay—Direct expenditure for construction of buildings, roads, and other improvements and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditures for repairs to fixed works and structures are classified as current expenditures for operations.

charter school—A school providing free public elementary and/or secondary education to eligible students under a specific charter granted by the state legislature or other appropriate authority, and designated by such authority to be a charter school.

construction—Production of fixed works and structures and additions, replacements, and major alterations thereto, including planning and design of specific projects, site improvements, and provision of equipment and facilities that are integral parts of a structure. Includes both construction undertaken on a contractual basis by private contractors or through a government's own staff (i.e., force account).

current expenditures—Current expenditures are comprised of expenditures for the day-to-day operation of schools and school districts for public elementary and secondary education, including expenditures for staff salaries and benefits, supplies, and purchased services. General administration expenditures and school administration expenditures are also included in current expenditures. Expenditures associated with repaying debts and capital outlays (e.g., purchases of land, school construction, and equipment) are excluded from current expenditures. Programs outside the scope of public prekindergarten through grade 12 education, such as community services and adult education are not included in current expenditures. Payments to private schools and payments to charter schools outside of the school district are also excluded from current expenditures.

debt—Long-term credit obligations of the school system or its parent government and all interest-bearing short-term (repayable within one year) credit obligations. Debt excludes non-interest-bearing short-term obligations, interfund obligations, amounts owed in a trust agency capacity, advances and contingent loans from other governments, and obligations to individuals from school system employee-retirement funds.

District urban-centric locale code—The locale code is an indicator of a district's location relative to a populous area. Locale code is a variable that NCES has created for general description, sampling, and other statistical purposes. It is based upon the location of the school buildings in the district and in some cases may not reflect the entire attendance area or residences

of enrolled students. The district urban-centric locale codes were derived from the locale codes of schools within the district, weighted by the number of students in each locale type.

The 12 urban-centric locale code categories are defined below. Locale codes are divided into four main locale types (city, suburb, town, and rural) and each of the four locale types has three subtypes (large, midsize, and small for city and suburb locale types and fringe, distant, and remote for town and rural locale types).

11 = City, Large: Territory inside an urbanized area and inside a principal city with population of 250,000 or more.

12 = City, Midsize: Territory inside an urbanized area and inside a principal city with population less than 250,000 and greater than or equal to 100,000.

13 = City, Small: Territory inside an urbanized area and inside a principal city with population less than 100,000.

21 = Suburb, Large: Territory outside a principal city and inside an urbanized area with population of 250,000 or more.

22 = Suburb, Midsize: Territory outside a principal city and inside an urbanized area with population less than 250,000 and greater than or equal to 100,000.

23 = Suburb, Small: Territory outside a principal city and inside an urbanized area with population less than 100,000.

31 = Town, Fringe: Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.

32 = Town, Distant: Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.

33 = Town, Remote: Territory inside an urban cluster that is more than 35 miles of an urbanized area.

41 = Rural, Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster.

42 = Rural, Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

43 = Rural, Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.

education service agency—An LEA whose primary function is to provide specialized services or programs to other LEAs.

elementary/secondary education—Programs providing instruction, or assisting in providing instruction, for students in prekindergarten, kindergarten, grades 1 through 12, and ungraded programs.

expenditures—All amounts of money paid out by a school system, net of recoveries and other correcting transactions, other than for retirement of debt, purchase of securities, extension of loans, and agency transactions. Expenditures include only external transactions of a school system and exclude noncash transactions such as the provision of perquisites or other in-kind payments.

federal revenues—Includes direct grant-in-aid to schools or agencies, funds distributed through a state or intermediate agency, and revenues in lieu of taxes to compensate a school district for nontaxable federal institutions within a district's boundary.

fiscal year—The 12-month period to which the annual operating budget applies. At the end of the fiscal year, the agency determines its financial condition and the results of its operations.

function—The function describes the activity for which a service of material object is acquired. The functions of a school district are classified into five broad areas: instruction, support services, operation of noninstructional services, facilities acquisition and construction, and debt service.

independent charter school district—A school district that includes only charter schools.

instruction and instruction-related expenditures—Includes expenditures for instruction and instructional staff support services. These are expenditures directly related to providing instruction and for activities that assist with classroom instruction. Instruction and instruction-related expenditures are more expansive than instruction expenditures in that all instruction related expenditures are accounted for, including salaries and benefits for teachers, teaching assistants, librarians and library aides, in-service teacher trainers, curriculum development, student assessment, technology (for students but outside the classroom), supplies, and purchased services related to these activities.

instruction expenditures—Expenditures for activities related to the interaction between teachers and students. Current instruction expenditures include expenditures for activities related to the interaction between teachers and students, including salaries and benefits for teachers and teacher aides, textbooks, supplies, and purchased services. These expenditures also include expenditures relating to extracurricular and co-curricular activities.

instructional staff support services—Activities that include instructional staff training, educational media (library and audiovisual), and other instructional staff support services.

interest on debt expenditures—Interest expenditures on long-term debt.

local education agency (LEA)—The government agency at the local level whose primary responsibility is to operate public schools or to contract for public school services.

local revenues—Includes revenues from such sources as local property and nonproperty taxes, investments, and student activities such as textbook sales, transportation and tuition fees, and food service revenues.

long-term debt—Debt payable more than one year after the date of issue.

magnet school—A special school or program designed to attract students of different racial/ethnic backgrounds for the purpose of reducing, preventing, or eliminating racial isolation (50 percent or more minority enrollment); and/or to provide an academic or social focus on a particular theme (e.g., science/math, performing arts, gifted/talented, or foreign language).

noncharter school district—A school district or LEA for which all schools associated with the district are not charter schools.

object—An object is a classification used to describe the service or commodity obtained as the result of a specific expenditure.

operations expenditures—Expenditures for the operation and maintenance of schools and school district facilities, and expenditures related to student transportation, food services, and enterprise operations.

other elementary/secondary education current expenditures—Current expenditures for food services and enterprise operations.

other program expenditures—Expenditures for community services, adult education, community colleges, private schools, and other programs that are not part of public elementary and secondary education.

payments to other school districts and private schools—Payments made to private schools and other school districts, including payments for tuition, transportation, and computer and purchasing services.

payments to state and local governments—Payments to state and local governments (except LEAs), including debt service payments to agencies that incur debt instead of the LEA.

public school—An institution that provides education services and: 1) has one or more grade groups (prekindergarten through grade 12) or is ungraded; 2) has one or more teachers to give instruction; 3) is located in one or more buildings or sites; 4) has an assigned administrator; 5) receives public funds as primary support; and 6) is operated by an education agency.

regular school district—All elementary and secondary school districts reporting membership, matching the nonfiscal LEA Universe Survey, and excluding independent charter school districts. Elementary and secondary school districts are defined by the F-33 school level code “01” (elementary school system only), “02” (secondary system only), and “03” (elementary/secondary school system).

Please note that this definition is different from the definition of “regular school district” in the nonfiscal LEA Universe Survey. See <http://nces.ed.gov/ccd/pdf/2015008.pdf> for the definition of “regular school district” in the LEA Universe Survey.

revenues—Additions to assets that do not incur an obligation that must be met at some future date, do not represent exchanges of fixed assets, and are available for expenditure by the LEAs in the state. Revenues include funds from local, intermediate, state, and federal sources.

special education school—A public elementary/secondary school that focuses primarily on special education—including instruction for any of the following students with: autism, deaf-blindness, developmental delay, hearing impairment, mental retardation, multiple disabilities, orthopedic impairment, serious emotional disturbance, specific learning disability, speech or

language impairment, traumatic brain injury, visual impairment, and other health impairments—and that adapts curriculum, materials, or instruction for students served.

state revenues—Includes both direct funds from state governments and funds in lieu of taxation. Revenues in lieu of taxes are paid to compensate a school district for nontaxable state institutions or facilities within the district’s boundary.

student membership—Annual headcount of students enrolled in school on October 1 or the school day closest to that date. In any given year, some small schools will not have any students. LEA Membership is the count of students for whom the LEA receives funding and is therefore responsible for educating. The student membership is a headcount, not full time equivalency (FTE). The term membership is often used interchangeably with enrollment in education policy reports and literature.

student support services—Includes attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other student support services.

support services—An expenditure function divided into seven subfunctions: student support services, instructional staff support, general administration, school administration, operations and maintenance, student transportation, and other support services.

Title I program—This federal program provides financial assistance through state education agencies to LEAs and schools with high numbers or high percentages of poor children to help ensure that all children meet challenging state academic standards. Funds are currently allocated based primarily on census poverty estimates and the state per pupil expenditure from NPEFS.

total expenditures—The sum of current expenditure, nonelementary/secondary expenditure, capital outlay, and interest payments on debts.

total revenues—The sum of revenue contributions emerging from local, state, and federal sources. Revenue received from bond sales or the sale of property or equipment is not included.

ungraded—A class that is not organized on the basis of grade grouping and has no standard grade designation. This includes regular classes that have no grade designations and special classes for exceptional students that have no grade designations. Such a class is likely to contain students of different ages who, frequently, are identified according to level of performance in one or more areas of instruction rather than according to grade level or age level.

unified school district—A school district that provides both elementary and secondary education services and instruction.

vocational education school—A public elementary/secondary school that focuses primarily on providing formal preparation for semiskilled, skilled, technical, or professional occupations for high school-age students who have opted to develop or expand their employment opportunities, often in lieu of preparing for college entry.

Appendix C: Reference Tables

Table C-1. Median current expenditures per pupil, difference, and percentage difference for the 24 states that reported data for both public elementary and secondary noncharter school districts and independent charter school districts, by state: Fiscal year 2013

State	Total for independent charter school districts	Total for regular noncharter school districts	Difference	Percentage difference
Arizona	\$7,169	\$7,464	-\$295	-4.0
Arkansas	7,489	8,966	-1,477	-16.5
Colorado	6,163	10,099	-3,936	-39.0

† Not applicable. The District of Columbia revenues come from local and federal sources only.

¹ Interschool system transactions are excluded to prevent double counting.² Funds spent operating local public schools and local education agencies, including expenditures such as; salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding; capital outlay, interest on school debt, payments to private schools, and payments to public charter schools.³ Includes payments to state and local governments, payments to private schools, interest on school system indebtedness, and nonelementary-secondary expenditures, such as adult education and community services expenditures.

NOTE: All local education agencies reported in the School District Finance Survey (F-33) are included in this table.

¹Funds spent operating local public schools and local education agencies, including such expenses as; salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding: capital outlay, interest on school debt, payments to private schools, payments to public charter schools, and nonelementary-secondary expenditures (such as adult education).

²Data have been adjusted to fiscal year 2012 dollars to account for inflation using the Consumer Price Index (CPI), which is published by the U.S. Department of Labor, Bureau of Labor Statistics. This price index measures the average change in inflation of a fixed market basket of goods and services purchased by consumers. For additional information about inflation-adjusted data, please refer to appendix A.

NOTE: How to read this table: Using Alabama as an example, if all school districts were listed by size of total revenues per pupil, the district at the midpoint (median) in 2011 would have total revenues per pupil of \$9,926 (in 2012 dollars).

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (F-33)," fiscal year 2011, Final Version 2a and fiscal year 2012, Provisional Version 1a; Digest of Education Statistics: 2012, retrieved November 21, 2013, from http://nces.ed.gov/programs/digest/d12/tables/dt12_034.asp.

¹The student membership obtained from the Common Core of Data (CCD) fiscal district data collection may vary slightly from the student membership obtained from the CCD nonfiscal data collection. Wyoming indicated that their fiscal data reported in the School District Finance Survey (F-33) excluded prekindergarten programs. In this state, the F-33 total student membership variable excludes prekindergarten membership.

²Funds spent operating local public schools and local education agencies, including such expenses as; salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding; capital outlay, interest on school debt, payments to private schools, and payments to public charter schools.

³The school district operates charter schools in addition to noncharter schools.

¹Interschool system expenditures are excluded to prevent double counting.

²Includes instruction and instructional staff support services current expenditures.

³Includes student support services, operation and maintenance of plant, student transportation, general administration, school administration, business, central, and other support services.

⁴Includes food services and enterprise operations current expenditures.

⁵Funds spent operating local public schools and local education agencies, including such expenses as; salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding; capital outlay, interest on school debt, payments to private schools, and payments to public charter schools.

⁶Includes purchased services, supplies, and other miscellaneous current expenditures.

NOTE: All local education agencies reported in the School District Finance Survey (F-33) are included in this table.

— Not available.

† Not applicable.

‡ Reporting standards not met. Data was suppressed when the unweighted response rate was below 80 percent for a state or 85 percent for the reporting states total.

¹Interschool system expenditures are excluded to prevent double counting.

²Includes instruction and instructional staff support services current expenditures.

³Includes student support services, operation and maintenance of plant, student transportation, general administration, school administration, business, central, and other support services.

⁴Number of districts or number of students in the F-33 survey that fall within the scope of either a noncharter school district or an independent charter school district.

⁵Number of districts or number of students in the F-33 survey that fall within the scope of either a noncharter school district or an independent charter school district and reflects only those districts that reported fiscal data greater than or equal to zero and student membership greater than zero.

⁶The student membership obtained from the Common Core of Data (CCD) fiscal district data collection may vary slightly from the student membership obtained from the CCD nonfiscal data collection.

⁷Student membership was not reported on the district-level CCD Local Education Agency Universe Survey for independent charter school districts in New Hampshire. As a result, the source of the student membership for both charter and noncharter school districts shown in this table for New Hampshire is state-aggregated membership from the school-level CCD Public Elementary-Secondary School Universe Survey.

⁸All associated schools are charter schools.

⁹Independent charter school districts, and school districts that have charter and noncharter schools are excluded from this category.

¹⁰Reporting states include only the states reported in this table.

NOTE: Median expenditures are reported for each data item, so details do not sum to totals.
